Hello Matt—Attached is my review of your manuscript (and sorry that I couldn't get to it last week). I was mostly in learning mode while reading it, so my comments are light. Good work!

I'd like your advice about how we can pilot a similar approach for some IRIS assessments. I think it would benefit both our centers. Would you be willing to set up an initial conference call with you or your management? Thank you!

Best regards,  
Vince

Hi Vince,  
Hope all is well. Let me know if you have any questions regarding the manuscript that would assist in the review process.  
Best,  
Matt

Wonderful Vince.  
Many thanks. Next week would be great.  
Best,

Matt

Hello Matt—Thank you for reaching out. I remember your name from the IARC participant lists and from the videoconference with Lek last week.

I'd be happy to serve as an internal reviewer. This week I'm supervising an IRIS public science meeting, so I won't get to the review till next week.

Thank you again,  
Vince

Dr. Cogliano,  
I do not believe we have formally met but have appreciated your intimate knowledge of IARC and its processes. We (Ivan Rusyn, Weihsueh Chiu, David Reif, Kate Guyton and myself) have compiled a manuscript on the incorporation of ToxCast data into the IARC Monographs. Kate recommended you as an EPA Reviewer for the manuscript as she stated you have seen presentations on this exact topic by Weihsueh and can bring valuable context to the work. I am working this manuscript through the internal clearance process as well as keeping the IO informed of the manuscript (i.e., will be sending final version up to Bob et al.). If you are unable to review the manuscript but can think of someone who may that would be great as well. All the best and thanks in advance for considering.  
Matt
